Course Description:

Day one will be live fire room entry and day two will be low light.

Low Light High Risk Room Entry with Simunition(R):

This time around we address a critical skill set important to your survival, low-light scenarios. Why is this type of training absolutely essential? Here are a few facts to consider...

- More than half of police involved critical incidents occur in low light conditions.
- Hit ratios suffer greatly in low light (even worse than the average of 18%).
- 75% of "Mistake-of-Fact" shootings occur in low light.

Some in the training community suggest that low light be more than half of an officers training days. We are promoting that idea for the 2014 Spring Training event. This is a force on force opportunity using Simunition(R) and actors. This time the targets shoot back...

NOTES & DISCLAIMER:

This course will be held in a residential location. If for some reason there is an issue with the location, other arrangements will be made. Location will be set 7 days before the course starts. If the course is cancelled, we will notify you as soon as possible.

The course fee does not include the ammunition. Simunition(R) will be available for purchase on site or bring your own. Budget an extra \$80.00 to \$120.00 for Sim. This course is for law enforcement, military or other enforcement agencies. Civilians must call to be approved to participate (call to apply).

Safety Policies:

Our usual safety policies will be in effect: The Glock 17's that we provide will NOT chamber a conventional 9mm round. But they are physically identical to the normal model 17. Safety is our first concern above all else. Call us for more information if you have questions.
